Vipanshi Jindal

vipanshijindal008@gmail.com / +91 7037012220 / Dehradun, uttarakhand

Summary

Developed a full stack web application using React for the front-end, Node.js and Express for the back-end, and MongoDB for the database. Implemented features such as user authentication using JWT and integrated with third-party APIs using Axios.

Completed Full stack Developer Certificate to enhance my skills .

My degree stats the reason for me to choose this role.

Projects

Hungries -- A food Ordering Mern Website

I created a vendor dashboard --frontend and backend and User FrontEnd part where user can order and look for different restaurant and food items
